

FRONTLINE SUPPORT

Civil Protection and Crisis Management

ACCESS™

Advanced Containerized Combat Effector
and Sensor System

Mission-Ready Support Infrastructure - Delivered Instantly.

JA Solutions develops advanced containerised and modular mission systems that enable rapid deployment and operational flexibility across maritime, land, and air domains.

The 20ft Frontline Support Container is a complete, autonomous support unit designed for civil protection organizations, humanitarian operations, and crisis response agencies. Combining power generation, water purification, heating, and satellite communications in a single transportable platform, it delivers critical capabilities exactly where they are needed.

With its plug-and-play design, the system can be operational within hours, providing clean water, dependable energy, climate support, and secure connectivity in environments where traditional infrastructure is unavailable or has been disrupted.

Power. Water. Heat. Connectivity. Anywhere. Anytime.

Integrated with the following:

Water purifier: 500L/Hour
Water storage: 2.000L
Diesel Genset for Electric Power:
110kVA, 400V, 50Hz
Heat boiler: 165kW
Tank: 140L/1200L
Communication module: Starlink

Auxiliaries:

Fire detection and fire fighting, HVAC,
Lighting(Red/White)
Insulation panels and side opening doors

Output connections:

Power: 1x CEE 32A 5P 400V, 1x CEE 16A 3P
230V, 1x CEE 63A 5P 400V
Water purifier: Intake: ½" & Output: 1"
Internet Router: Ethernet
Heat exchanger intake and output: ¾"
Outside operating temperature: +5°C to +40°C
